

TUBES[®] International

about us

Tubes International provides professional solutions concerning hoses and couplings as well as hydraulic hose assemblies for all branches of industry. Since 1993, when the company was founded, the range of products and services is available via our own sales network.

At the very beginning we decided to work with world's leading manufacturers to be able to deliver products meeting the highest technical, health and safety, and environment protection standards.

Timeline:

1993 Tubes International is founded in Poland.

1993 - 1998 Sales and customer service from the company's head office.

1998 The new company's strategy aims to develop its own sales network in Poland.

2001 The modern head office of Tubes International and warehouse opens.

2002 Foreign market expansion strategy:

- **2002 Tubes International s.r.o. Czech Republic**
- **2005 TOW Tubes International Ukraine**
- **2007 Tubes International s.r.o. Slovakia**
- **2007 UAB Tubes International Lithuania**
- **2008 OOO Tubes International Russia**
- **2010 TOO Tubes International Kazakhstan**
- **2015 Tubes International Norge AS**

2003 Quality management certificate ISO 9001:2000 issued by DNV is obtained.

2007 The company joins an organisation of industrial products suppliers EDIS - www.edisnet.com.

2007 New production facility manufacturing custom-made fittings opens.

2008 The company is certified to mark pressure hose assemblies with CE according to Pressure Equipment Directive 97/23/EC.

2012 New warehouse and logistics centre opens in Poznań.

2015 New agency is launched in Germany.

2015 E-shop opens.

2016 We make a team of 400 highly qualified employees.

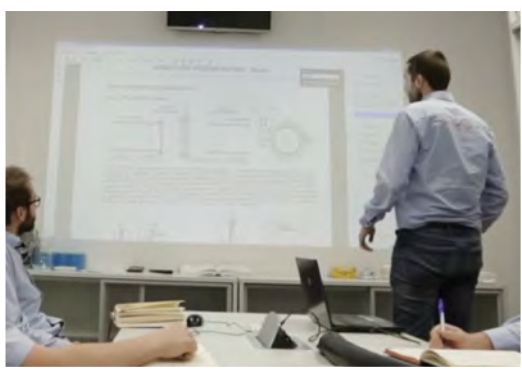

2018 25 years Tubes International.

2019 Launch of the new version of E-shop.

2020 Tubes Engineering - a newly opened Tubes company

2022 The company joins NAHAD - The Association for Hose and Accessories Distribution

2023 30 years Tubes International.

*Over 30 years of experience
supplying hoses and couplings for industry!*

strategy and mission

Tubes International is one of the fastest growing companies in the industrial hoses and fittings market in Europe. Over the years we have earned the huge trust of our Customer, therefore we are asked to provide solutions to increasingly demanding and dangerous applications. Our experience and procedures are regularly verified by research centres and internal or external auditors and then confirmed by different kinds of certificates, licenses or reports. It allows further improvement of our activity as well as quality of management. The strategy of our company is based on the mission statement of Tubes International:

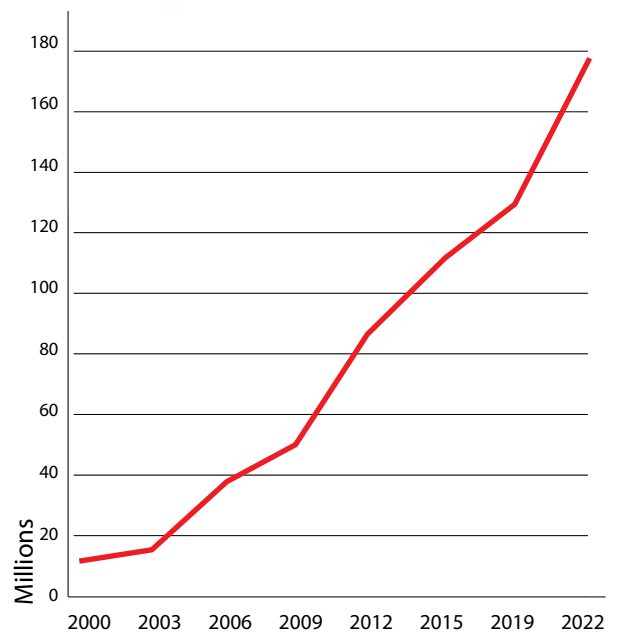

„Aware of the burden of responsibility regarding product solutions delivered by us on day to day basis, we face growing demands of industry and promise to do our very best to satisfy the needs of our Customers in terms of the range of offered products, their quality as well as professional service ensured by the commitment of all employees of the Company.“

Our efforts and activities focus on four basic areas:

- as far as the Customer is concerned - to become a preferred provider of industrial hoses and hose assemblies,
- market expansion through development of our own sales network,
- provide the safest and most innovative solutions for the industry,
- constantly improve qualifications of our employees.

TURNOVER

market and quality

Market and our Customers

Industrial hoses and couplings supplied by Tubes International are used for multiple applications in dozens of industry sectors. It is an effect of an extensive product range and professional experience of our employees. Nowadays, as we have gained a reputation as a proactive and reliable supplier, we are sked to work on even more sophisticated and complex projects concerning hoses and couplings for the industry.

Today we provide our services for all industry sectors, such as:

- chemical industry
- mining industry
- gas industry
- electronic industry
- automotive industry
- design and construction
- metallurgical industry
- rail industry
- offshore industry
- petrochemical industry
- power industry
- food industry
- pharmaceutical industry
- aviation industry

To receive detailed information on credentials concerning a particular industry sector or particular company, please contact us.

Tubes International guarantees the highest quality standards of products and services delivered. It is proved by the certificates granted. On Customer request, the Quality and Conformity Certificates are issued to confirm the safety standards and compliance with Customer's requirements.

The most important certificates:

- ISO 9001 issued by DNV
- ISO 9001 issued by TDT-CERT
- UDT-CERT (1433) - Pressure Equipment Directive (2014/68/EU) Module A2
- Certificate of Conformity (WE) issued by UDT
- ISO 3834-2 issued by TDT-CERT
- NATO – supplier code
- WDT approval

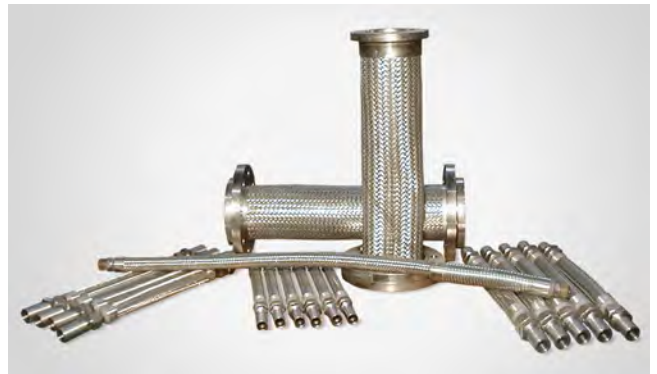

products

Industrial hoses and compensators

- plastic hoses
- thermoplastic hoses
- rubber hoses
- PTFE hoses
- silicone hoses
- composite hoses
- metal hoses
- Tygon® hoses

- rubber compensators
- steel compensators
- PTFE compensators
- fabric compensators

Quick release couplings, clamps, couplings, valves

- couplings of various standards: CAMLOCK, TW, STORZ, NOR, GOST, SMS, API, Hammer Lug
- dry disconnect couplings
- emergency breakaway couplings
- threaded and flanged couplings
- rotary unions
- hygienic fittings
- fittings, connectors
- fuel nozzles
- spray guns
- industrial clamps and valves

products

High pressure hydraulics and ultra high pressure

- rubber and thermoplastic hoses
- WATERBLAST and Spir Star® hoses
- hose fittings and ferrules
- DIN 2353, JIC, ORFS connectors
- hydraulic precision pipes
- quick release couplings, rotary unions
- hydraulic valves and adaptors
- hydraulic pumps and directional control valves
- measurement systems
- pressure gauges

Pneumatics

- compressed air hoses
- PUSH IN type fittings
- pneumatic quick release couplings
- pneumatic valves
- air treatment units, FRL type
- actuators and other drives
- blow guns

products

Machines and equipment

- hose crimping machines
- hose cutting equipment
- hose skiving equipment
- hose marking equipment
- hose testing equipment
- hose cleaning equipment
- hose racks
- hydraulic pipe bending and processing equipment

Other products

- hose reels
- hose protection elements and safety systems
- rubber and metal seals
- sealants
- surface coatings and industrial chemicals

Industrial hose assembly production

We produce complete industrial hose assemblies precisely matched to the working conditions of an installation still under construction or of already existing one. We produce industrial hose assemblies with internal diameter up to 8" (when an external crimping method is used). We easily manage single-item or serial production of hose assemblies according to the specific requirements of our Customers. That is our advantage! Our flexible hose assemblies are used to convey water and air, steam, foodstuff, fuel, oil and other petrochemical products, all kinds of chemicals, gases, solids, etc.

Hydraulic and ultra high pressure hose assembly production

We assemble all types of hydraulic hose assemblies – from regular rubber hydraulic hoses through thermoplastic, PTFE hoses, to highly specialised hoses for ultra high pressure - with working pressure up to 3200 bar. We can be your supplier for either series production or single custom-made hose assemblies according to Customer specification. On Customer request, the hose assemblies can be additionally processed e.g. special marking, extra tests, cleaning, individual packaging.

Service of machines and equipment, other services

We provide warranty and post-warranty service of the entire range of machines and equipment available in our portfolio. Having well trained employees, original spare parts and proper tools we can guarantee the highest level of reliability of the machines and equipment we supply.

We can also provide the following services:

- **24h service available in selected branches,**
- **service of industrial hose assemblies at a Customer's location,**
- **employee training courses for our Customers - courses concerning hoses and couplings,**
- **service of machines and equipment – high pressure hydraulics,**
- **3D pipe bending.**

sale

Sale of products and services

Tubes International is always nearby

According to the strategy adopted by the company – to be as close to the Customer as possible, we recommend our sales network to purchase our products and services. An up-to-date list of all branches is available at our website.

Our sales network brings the following benefits to you:

- wide range of products available at one place,
- service on the spot – industrial and hydraulic hose assembly production,
- 24h service in all branches intended for it (up-to-date list is available at our website),
- technical advice and training.

We offer competitive prices specially tailored for our key and regular Customers. We keep sufficient stock levels always at hand in our warehouses and make other individual arrangements.

easy access

The fastest way to contact us

• E-mail and phone

If you are interested in our products or services, please contact the Head Office or the nearest Tubes International branch by phone or e-mail.

Current contact details are available at our website.

• Website

If you want to stay updated with the latest news and information on the company, products and services, please visit our website.

• E-shop

E-shop is available 24 hours a day, so our Customers can buy products on the Internet whenever it suits them. Both business and individual Customers can purchase products at our e-shop without previous registration or logging in.

• Catalogue

A printed or CD version of our catalogue is available in five languages: Polish, English, Czech and Lithuanian. On your request, we supply the catalogue free of charge.

• Brochures and leaflets

Technical information on chosen products is available at our website as special technical brochures.
